(54) Title: TRACKING SYSTEM OF HUMAN BEINGS, ANIMALS OR OBJECTS

FIGURE 1

(57) Abstract: The present invention is about a tracking system of human beings suitable for geographical and temporal identification of all individuals to be benefited by the system. The tamper-proof tracking system of human beings, according to the invention, comprises: a) one or more transceiver devices located inside the body to be tracked, capable of storing and/or transmitting information of an individual's positioning; b) information collecting and transmitting network, for data sent by the transceiver elements, which may include satellite stations; c) portable or mobile devices for immediate personal identification; d) sub-centers or sub-stations, for simultaneous and immediate availability of data; e) central site for storing all data picked up and transmitted by the collecting network.

Box No. I Nucleotide and/or amino acid sequence(s) (Continuation of item 1.b of the first sheet)

Continuation of first sheet

1. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, the international search was carried out on the basis of:

Continuation No. IV:**Text of the abstract****(Continuation of item 5 of the first sheet)**

The invention relates to a tracking system of human beings suitable for geographical and temporal identification of all individuals to be benefited by the system. The tamper-proof tracking system of human beings, according to the invention, comprises: a) one or more transceiver devices (1) located inside the body to be tracked, capable of storing and/or transmitting information of an individual's positioning; b) information collecting and transmitting network (2), for data sent by the transceiver elements, which may include satellite stations (4); c) portable or mobile devices for immediate personal identification; d) sub-centers or sub-stations, for simultaneous and immediate availability of data; e) central site (3) for storing all data picked up and transmitted by the collecting network.
