(54) Title: CLUTCH ACTUATOR FOR A VEHICLE

Fig. 1

(57) Abstract: The present invention relates to a clutch actuator for a combustion engine, comprising -a motor for generating a motor torque -transmission means for transforming said motor torque into a force for generating a operating movement able to act on a clutch operating mechanism to operate a clutch, and -a brake able to generate a braking force for braking said means, wherein the braking force able to be generated by said brake is less than the maximum force for generating a operating movement. The invention also relates to a vehicle comprising a clutch actuator and a method and software for failsafe operation of a clutch actuator.
