(54) Title: METHODS AND APPARATUS TO REACH THROUGH TO BUSINESS LOGIC SERVICES

FIG. 1

(57) Abstract: Methods and systems to reach through to business logic services are disclosed. An example method involves receiving a report request from a portal and building context information based on the request. Additionally, the example method includes generating context extensible markup language (XML) associated with the context information, assigning a context identifier to the context XML, and returning the context identifier to the portal for forwarding to the business intelligence application to initiate a service associated with the context information.
