Title: COOKING SYSTEM WITH PIVOTING COLANDER MEMBER

Abstract: The present invention relates to a cooking pot having an integrated and removable strainer or colander member (2). More specifically, the present invention relates to a cooking system involving an outer cooking pot member (1) and a lockably pivoting and removable colander member (2) allowing the system to cook food and also provide for a pivoting straining of the food following use without removing the colander (2) from the supporting pot.

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents

'A' document defining the general date of the invention which is not considered to be of particular relevance

'E' earlier application or patent published on or after the international filing date

'L' document which may throw doubts on the novelty claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

'O' document referring to an oral disclosure, use, exhibition or other means

'P' document published prior to the international filing date but later than the priority date claimed

'T' later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

'X' document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

'Y' document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

'Ω' document member of the same patent family
