(54) **Arrangements for fastening fabrics to supporting structural members and standing sunshade made according thereof.**

(57) Applicable to covers, tarpaulin canvases, large sized sunshades, screens, supporting and grooving fabrics, filters, etc. of the type including onto a longitudinal edge of said fabric (1), very close to the structural member (5) to which it has to be fastened, an enlarged retaining element, which is arranged embedded within a related groove having a narrow mouth and a passage-way downstream the section of said retaining element, this groove being shaped in said structural member (5). It is proposed that said retaining element comprises an elongated profile (2, 2a, 2b) provided with a longitudinal opening (3) in the interior of whose profile (2, 2a, 2b) a peripheral band (1a), very close to a side edge of the fabric or canvas (1) to be fastened, remains locked between said profile and a strip (4), having suitable shape, socketed in said longitudinal opening (3). The invention also refers to a sunshade, namely large sized, constructed by using said arrangement.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 98 50 0068

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
