Title: PORTABLE ELECTRONIC DEVICE PHYSICAL SECURITY APPARATUS WITH ALARMED CABLE

Abstract: A security device (300') for preventing removal and theft of valuable devices includes an alarm (333) that is coupled to a cable (32). At a distal end of the cable, a locking device is provided. The locking device is coupled to valuable device. The other end of the cable is coupled to the alarm. The alarm includes a power source. A lock plate (309') is placed over the power source. The cable is routed through the alarm and through the lock plate prior to coupling the locking device to the portable electronic device. With the cable through the alarm and the lock plate, the lock plate cannot be removed and thus, the power source is inaccessible. A wire loop runs through the cable and is coupled to the alarm such that if the cable is cut, the circuit is broken and the alarm sounds.
Declaration under Rule 4.17:
— of inventorship (Rule 4.17(iv)) for US only

INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
IPC(7) : G08B 13/12, 13/14
US CL : 340/568.2
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
U.S. : 340/568.2, 568.1, 568.4, 542, 548, 596, 432; 70/58

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT
