FIGURE 1 is a perspective view of a combined tissue dispenser, and litter and accessory container, for automobiles, embodying my new design, the cover being shown in open condition;

FIGURE 2 is a plan view, showing the cover in closed condition;

FIGURE 3 is a side elevation, showing the side illustrated in FIGURE 1; and

FIGURE 4 is an end elevation of the end not illustrated in FIGURE 1.

The side not shown in FIGURES 1 and 3 is identical to the side shown therein except that there is no horizontal slot, the surface instead being plain.

The dominant features of the design reside in the portions shown in full lines.

I claim:

The ornamental design for a combined tissue dispenser, and litter and accessory container, for automobiles, substantially as shown and described.
