(54) Title: USER INTERFACE WITH MULTIPLE SIMULTANEOUS FOCUS AREAS

(57) Abstract: The present application relates to a system and method for a user interface for keypad driven devices, such as mobile phones. The user interface provides an ability to control two simultaneous focus elements on a display screen at once. Each focus element can be controlled by a separate set of keys, for example. Each focus element may be included within separate control content areas of the user interface.

☐ Further documents are listed in the continuation of Box C.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
