(57) **CLAIM**

The ornamental design for an automation controller, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the automation controller showing our new design, it being understood that the cut away portion indicates that the controller has an indeterminate length and that it has a uniform shape and appearance through its length.

FIG. 2 is top plan view of the automation controller set forth in FIG. 1;

FIG. 3 is a front elevational view of the automation controller set forth in FIG. 1;

FIG. 4 is a rear elevational view of the automation controller set forth in FIG. 1;

FIG. 5 is a right side elevational view of the automation controller set forth in FIG. 1;

FIG. 6 is a left side elevational view of the automation controller set forth in FIG. 1; and,

FIG. 7 is a bottom plan view of the automation controller set forth in FIG. 1.

In these drawings, the solid lines illustrate the claimed ornamental design, whereas the broken lines illustrate environmental features that form no part of the claimed ornamental design.
