(54) Title: FOLDABLE BLANK IN USE WITH A BAG MATERIAL FOR SECURING AND RETAINING ARTICLES OF EVIDENCE IN TAMPER-EVIDENT FASHION AND INCLUDING SIDE CONFIGURED EVIDENCE RE-ENTRY LOCATIONS WITH ADDITIONAL TAMPER EVIDENT RECLOSURE AND RECORDING FEATURES

FIG - 1

(57) Abstract: A tamper-evident evidence bag including a blank having first and second planar shaped and pivotally connected panels. The bag has an open perimeter edge and is secured to first selected facing surfaces of the pivotally connected panels and such that an interior of the bag is communicable through an aperture defined between the panels. The first and second panels are folded from an open position, in which they panels are established in a substantially parallel relationship, to a closed position in which opposingly facing surfaces of are adhered against one another and in order to maintain, in tamper-evident fashion, items placed within the bag enclosure. Additional tamper-evident resealing structure is located along at least one facing side of the associated bag material, allowing documentable re-entry of the pre-sealed evidence bag. The tamper-evident resealing structure includes a re-closable and adhesives peel away flap, a reverse face of includes recordable information fields for documenting the particulars of the re-entry and subsequent tamper evident-resealing event.
