Claim

The ornamental design for a headgear connector for patient interface, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a headgear connector for patient interface showing the first embodiment in a position of use, according to our new design;

FIG. 2 is an enlarged perspective view thereof;

FIG. 3 is a front view thereof;

FIG. 4 is a rear view thereof;

FIG. 5 is a top view thereof;

FIG. 6 is a bottom view thereof;

FIG. 7 is a right side view thereof;

FIG. 8 is a left side view thereof;

FIG. 9 is a perspective view of a headgear connector for patient interface showing the second embodiment in a position of use, according to our new design;

FIG. 10 is an enlarged perspective view thereof in isolation;

FIG. 11 is a front view thereof;

FIG. 12 is a rear view thereof;

FIG. 13 is a top view thereof;

FIG. 14 is a bottom view thereof;

FIG. 15 is a right side view thereof, and;

FIG. 16 is a left side view thereof.

The broken line showing the patient interface in FIGS. 1 and 9 illustrates the environment of the claimed design and forms no part thereof. The broken lines in FIGS. 4 and 12 illustrate portions of the headgear connector for patient interface which form no part of the claimed design.

Line shading and stippling have been used in the drawings to indicate a contrast in appearance.
