Abstract: A motion sickness reduction device includes an image capture device for capturing an image of a device environment and an image display device for displaying an image related to the captured image. In order to effectively prevent or reduce motion sickness, the right amount of motion must be displayed on the image display device when the vehicle accelerates or turns. Various methods are disclosed for adjusting the image on the display device and/or the angle of the environment subtended to make the motion sickness reduction device effective.
INTERNATIONAL SEARCH REPORT

A CLASSIFICATION OF SUBJECT MATTER
IPC(8) - H04N 5/225 (2008.01)
USPC - 348/207.99

According to International Patent Classification (IPC) or to both national classification and IPC

B FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC(8) - H04N 5/225 (2008 01)
USPC 348/207 99

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

D Further documents are listed in the continuation of Box C

E Special categories of cited documents
"A" document defining the general state of the art which is not considered to be of particular relevance
"E" earlier application or patent but published on or after the international filing date
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
"O" document referred to in an oral disclosure, use, exhibition or other means
"P" document published pior to the international filing date but later than the priority date claimed
"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"Q" document member of the same patent family
