(54) Title: COMBINATION BANDAGE AND WOUND TREATMENT SYSTEM

(57) Abstract: A wound treatment system including a housing having a first compartment and a second compartment, a bandage disposed within the first compartment, and a swab disposed within the second compartment. Further, the first compartment is openable independent of the second compartment, and the second compartment is openable independent of the first compartment. The wound treatment combination and bandages provides access to both disinfecting along with treating topically as well as covering wounds and scars at nearly sterile conditions to allow optimal healing and lowering the risk of infection and contamination and scars. The variable sizes envisioned allows for treatment of both small as well as larger surfaces.
