CLAIM

The ornamental design for a door sill threshold cap, as shown and described.

DESCRIPTION

FIG. 1 is a front right perspective of our new design;
FIG. 2 is another front right perspective thereof;
FIG. 3 is a right side elevational view thereof, the opposite side being a mirror image thereof;
FIG. 4 is another right side elevational view, the opposite side being a mirror image thereof;
FIG. 5 is a front view thereof;
FIG. 6 is a top view thereof;
FIG. 7 is a front right perspective view of a second embodiment of our design;
FIG. 8 is another front right perspective view thereof;
FIG. 9 is a right side elevational view thereof, the opposite side being a mirror image thereof;
FIG. 10 is another right side elevational view, the opposite side being a mirror image thereof;
FIG. 11 is a front view thereof; and,
FIG. 12 is a top view thereof.

The views of the door sill threshold cap not shown form no part of the claimed design. The dashed lines in the Figures refer to environmental or optional elements only and form no part of the claimed design. The rectangular dashed lines shown on the right portion within the cap in FIGS. 1-4 and 7-12 represent an optional void in the cap. The broken lines shown in FIGS. 1-2, 5-6, 7-8 and 11-12 indicate indefinite length. The partially cylindrical object in FIGS. 1-4 and the weather-strip fin in FIGS. 7-10 (both of which are shown in approximately the center of the cap and below a cap top portion) are shown in solid lines and indicate the spatial relationship of these elements in relation to the remainder of the cap. The specific structure that may support these elements is shown in dashed lines in FIGS. 2, 4, 8, and 10 and is not claimed.
