(54) Title: A HOT BEVERAGE PREPARATION MACHINE

Figure 1

(57) Abstract: The present invention relates to a hot beverage preparation machine (1) comprising a water container (2) wherein water is filled, a water heater (3) enabling the water in the water container (2) to be heated, a temperature sensor (4) that is disposed on the water container (2) and that measures the temperature of the water heated in the water container (2), a brewing chamber (5) wherein the raw material of the beverage to be prepared is put and whereto the water heated in the water container (2) is transferred, wherein the brewing process is performed as a result of the interaction between the raw beverage material and water, a platform (6) whereon the water container (2) is placed, a pump (7) that is disposed on the water container (2) and that enables the water heated in the water container (2) to be transferred to the brewing chamber (5), and at least one connector (9), one end contacting the platform (6) and the other end contacting the water container (2) when the water container (2) is placed onto the platform (6).

INTERNATIONAL SEARCH REPORT

International application No
PCT/TR2014/000294

A. CLASSIFICATION OF SUBJECT MATTER
INV. A47J31/10 A47J31/56
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
A47J A23F B01F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

EPO-Internal, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y	EP 2 005 865 A1 (LEE WEN-CHING [TW]) 24 December 2008 (2008-12-24) figure 1 -----	1-5
Y	WO 98/27854 A1 (PHILIPS ELECTRONICS NV [NL]; PHILIPS NORDEN AB [SE]) 2 July 1998 (1998-07-02) According to the invention, the temperature sensor provides temperature information to a control device, the control device controlling the actuation of the pump. ----- -/--	1-5

[X] Further documents are listed in the continuation of Box C.

[X] See patent family annex.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
