(57) **CLAIM**

The ornamental design for a surgical forceps, as shown and described.

**DESCRIPTION**

FIG. 1 is a side view of a surgical forceps of a first embodiment of the present invention;  
 FIG. 2 is a top view thereof, wherein the bottom view is the same as the top view;  
 FIG. 3 is a front perspective view thereof;  
 FIG. 4 is a side view thereof, shown in an open position;  
 FIG. 5 is a side view thereof, shown in a closed position;  
 FIG. 6 is a top view of a second embodiment of a surgical forceps of the present invention, shown in an open position;  
 FIG. 7 is a side view thereof, shown in a closed position;  
 FIG. 8 is a top view thereof, wherein the bottom view is the same as the top view;  
 FIG. 9 is a rear perspective view thereof;  
 FIG. 10 is a top view of an upper portion of a third embodiment of a surgical forceps of the present invention;  
 FIG. 11 is a partial side view of the upper portion of a surgical forceps thereof;  
 FIG. 12 is a side view of the upper portion and a lower portion of the surgical forceps of the third embodiment of the present invention, shown in an open position;  
 FIG. 13 is a side view thereof, shown in a closed position; and,  
 FIG. 14 is a top view thereof.

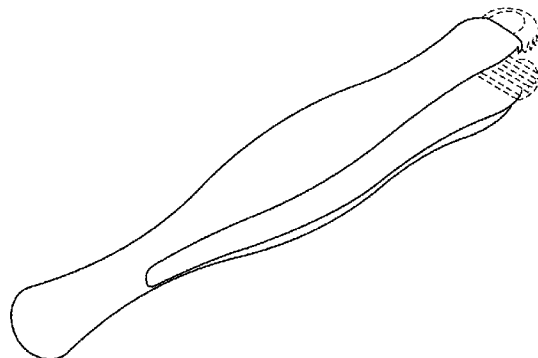

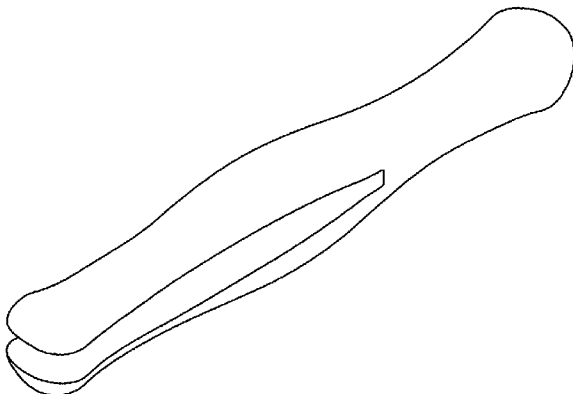

The broken line in the drawings is included for the purpose of illustrating environmental structures and forms no part of the claimed design.
